# REVOLUTION THROUGH EVOLUTION

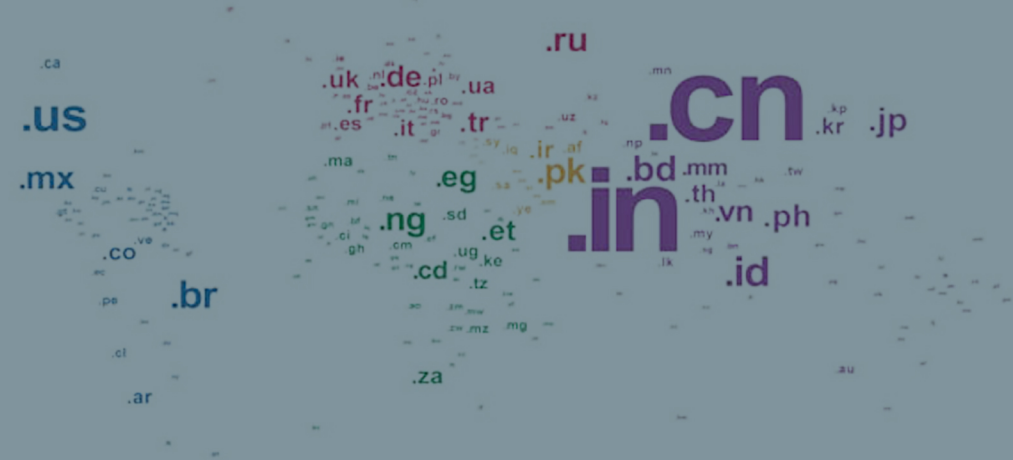

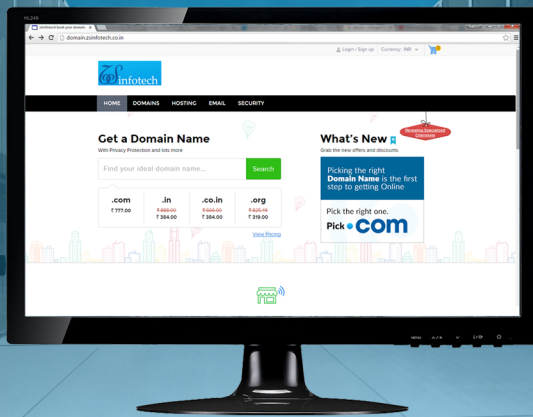

Eight years is an eternity when talking about the Internet, so web design companies that don't evolve are doomed to extinction. Hub4India has not only survived, but developed and thrived successfully since 2007, by aligning itself precisely with the evolving needs of its customers. Although web design is an unregulated industry, Hub4India creates websites to industry "Best Practise Guidelines" in usability, accessibility, security and produces programming code to meet the highest international standards. Hub4India websites always have the edge over their competitors.

In 2012, Hub4India is now recognised zsinfotech, as one of the national strongest and most innovative website design and development consultancies, with a growing and dynamic team of diversely-talented developers, programmers and marketing people. In its pursuit of excellence, Hub4India ensures that each member of the team becomes the company's specialist in a particular field, whether it be search engine optimisation (SEO), marketing, site usability and accessibility, design standards compliance and more. Each specialist then cascades knowledge down to colleagues, so creating a matrix of skills and expertise. This means that when clients contact Hub4India, they can immediately enjoy a meaningful dialogue with any member of the team. The high level of ownership of client projects at Hub4India produces aston-

# CREATE YOUR OWN ONLINE BUSINESS IDEAS

Domain Name Registration India, Register Website, Register Domain Name, Domain Search India, Register a Domain, Register a Website, How to Register a website, How to Register a Domain Name, Web Domain Registration, Web Registration.

Register Web Domain Provides Cheap Domain registration India, which helps you to register domain name fast, simple, and affordable. Our Domain search allows you to search all country domains with ease steps!!

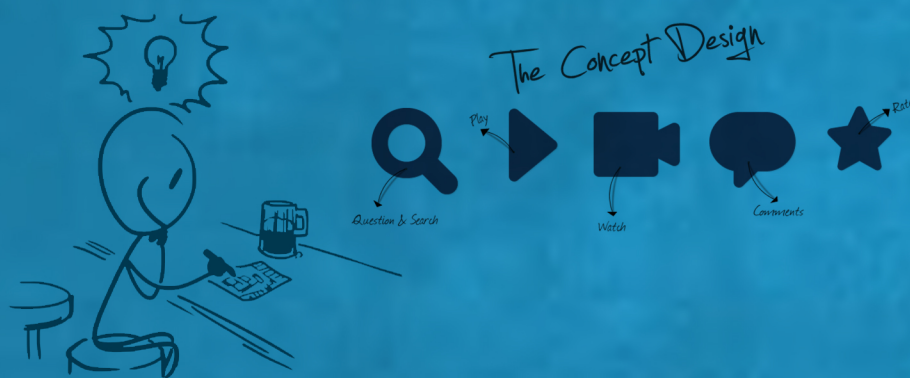

# CREATE CONCEPT AND BRAND

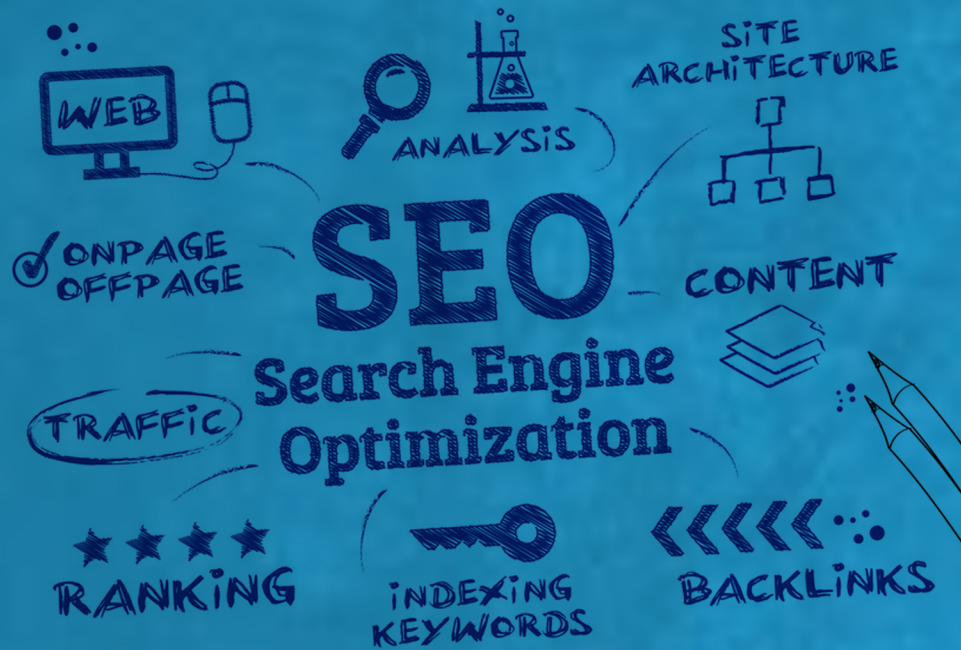

Fresh ideas are key to all that we do. Our ability to create new concepts that challenge conventional thinking keeps us one step ahead of our competitors. And it is this same uncanny talent for finding fresh perspectives that will boost your business too.

As designers, we can never rest. No matter where we are, we find ourselves absorbing interesting imagery, captivating words and emotive design. So when we begin working on your design project, we already have a wealth of exciting ideas that we can use as a starting point.

Matching our innovative ideas to your specific requirements, we will develop designs that complement your business, give you a powerful brand, and help you to reach your target market.

# RANKINGS WITH SEARCH ENGINE OPTIMISATION

Is your web site lonely and struggling to attract visitors? Then you need our help. With the Vital Concept Search Engine Optimisation (SEO) service, we will transform your underperforming, unnoticed web site into a powerful sales tool that ranks high in the major search engines such as Google and Yahoo.

Every day, millions of people rely on search engines to direct them to the web sites they need. So if you want your web site to attract new customers and boost your profits, you have to have high search engine rankings. Ideally, you need to be listed on the first page of results. Competition for high rankings is fierce, but with our professional SEO Services, we can give your web site the best chance of success.

# APPLICATION MANAGEMENT & MAINTENANCE

In today's environment, businesses are highly dependent on IT systems for day to day operations. As your business evolves, applications need to change to suit new business scenarios. Application Support and Maintenance is an important element towards enhancing and extending the life of the applications. Zensar focuses on seamlessly maintaining and transforming your business-critical applications to meet changing business needs.

We Application Support & Maintenance Service ensures your business applications are managed and operated seamlessly to provide secure and high performance platform. Faster time-to-market, Improved operational efficiency and reduced cost by decreasing the number and duration of business-critical application outages & Best utilization of improved productivity for strategic initiatives

We Application Support model is an evolved and proven multi-tiered framework on which our support solutions are based upon that are offer to suit all needs of our customers. Our support model provides high-availability service products in a networked environment. In the levelled support model, organizational functions are placed in an escalation hierarchy with clear lines of demarcation between functions to ensure that responsibilities and duties are clearly defined. Depending on the nature of your IT infrastructure, how many users there are, and how critical it is to your day to day operations, we tailor a solution to meet your exact needs.

# YOUR USERS AT THE HEART OF THE PROCESS

When we build your new website, we're also working with you to solve any business problems you may have. You might need more visitors, conversions or sales, or all three. We'll work with you to make that happen.

We create websites that provide a great user experience and look good on all sorts of devices: smartphones, tablets, desktops and even TVs. This is known as responsive design.

Our design process is content-first, meaning we start to collect your content before design begins. This to ensure we design your site around exactly what you need it to say and how you need it to be said.

Once we have your content and a thorough understanding of your needs, we design simple mockups of pages, called wireframes, which allow us to test the functionality and whether it's appropriate for what the user wants to do. Only when you are completely happy with our ideas, will we begin to design your site.

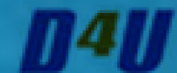

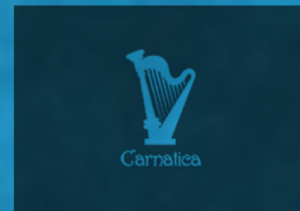

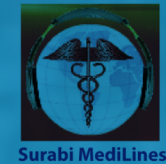

Once you are happy with our designs, we will build your site using code or a content management system. All the elements are put together and thoroughly tested to make sure they work seamlessly, then put live.

We can build websites using the WordPress and Joomla! platforms, depending on the functionality you need.
